Sabanci Holding Unifies Data with *Microsoft Fabric*

Sabancı Holding, one of Turkey's largest and most diverse conglomerates, faced fragmented data systems that hampered timely decision-making. To keep up with fast-paced business demands, they needed a unified data platform to enhance insights and accelerate operations.

The Limits They Wanted to Surpass

- Disconnected data spread across multiple systems
- Time-consuming data preparation and manual analysis
- Slow decision-making due to delayed insights
- Inefficient processes hindering collaboration across department
- Struggled to integrate business intelligence tools with existing systems

The Transformation Blueprint

- Migration to Microsoft Fabric for a single, unified data platform
- Implementation of Microsoft 365 Copilot for streamlined workflows and automation
- Real-time data processing and visualization for faster decisions
- Enhanced collaboration across global teams with Microsoft 365 tools
- Simplified data governance and compliance

The Outcome: Transformation in Motion

Data flow across departments unified, improving efficiency by 50%

Real-time insights driving quicker, more informed decisions
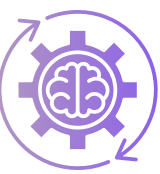

IT overhead reduced, freeing up resources for strategic tasks

Microsoft 365 Copilot increased employee productivity through AI-driven automation

Faster collaboration between teams and improved data accuracy

What began as a data consolidation project turned into a game-changing transformation for Sabanci Holding.

If Sabanci did it, why not you?

With Microsoft Fabric and 365 Copilot, they unified data and made faster decisions. At DynaTech, we help businesses do the same—simplify, scale, and succeed.
